

Fully rigid colour co-ordinated cabinets

Our N&C Phlexicare cabinet carcasses constructed from a high quality, 18mm thick melamine board, available in a range of colour co-ordinated finishes. Only the best workmanship is deemed acceptable with our kitchens and that's why we don't compromise on quality. The units are glued and dowelled to give a solid pre-assembled construction. Our cabinets for both Hartland and Arundel come in a standard white finish. However, if you want that totally co-ordinated look, opt for our Hartland Plus or Arundel Plus ranges.

Recessed Plinth.

- All doors have 170 degree clip on hinges as standard
- Soft close on doors and drawers is available
- Plinths are 300mm high x 2400 mm long,
- Plinths include clear sealing strip to the floor joint.
- Wall hanging brackets made from robust rolled steel (max load 130kg per pair)
- Base and wall unit shelving have 3 height adjustment
- Drawer pack units have solid Blum Metabox drawer boxes with the bottom and back panels co-ordinated to the carcasse finish

1 Hartland Range

Comes with a strong rigid white carcasse only.

2 Hartland Plus Range

Available with 6 strong, rigid, colour co-ordinated carcasse options.

3 Arundel Range

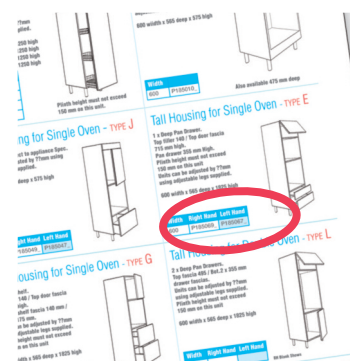

Comes with a strong rigid white carcasse only.

4 Arundel Plus Range

Available with 6 strong, rigid, colour co-ordinated carcasse options.

Coding System

When ordering your kitchen units, we have adopted a coding to allow easy specification of each range.

For example to denote Hartland Range simply enter number 1 at the end of the code, ie:

For Hartland Plus enter 2

Please Note:-

All base and tall unit height dimensions exclude legs and plinth
